EXPERIENCE

SDE Summer Intern **Aug 2026 – Oct 2026**
Siemens Digital Industries Software | On-Site
Tech Stack: Polarion ALM, Jenkins, Git, REST API

- Configured Polarion ALM across 14 core areas – including work item types, workflows, custom fields, roles & permissions, and traceability – tailored to client-specific compliance and process requirements.
- Integrated Polarion with Jenkins, Git, REST APIs, and a ticket management system, enabling automated build tracking and end-to-end traceability from incoming tickets to formal requirement work items.
- Authored the admin Configuration Guide and a narrated end-user walkthrough, standardizing client onboarding and documentation.

Freelance Web Developer **Nov 2025 – Dec 2025**
Client Portfolio Website | Remote
Tech Stack: HTML, CSS, JavaScript, Vercel

- Designed and built a responsive portfolio website for an international client from their requirements and UI preferences, delivered as a paid engagement.
- Implemented project showcase sections and responsive layouts across desktop, tablet, and mobile.
- Handled deployment on Vercel and post-delivery support.

Frontend Developer **Oct 2025**
amBITion Hackathon Website | Team of 3
Tech Stack: React, Vite, JavaScript, HTML, CSS, GitHub

- Built and maintained the official website for a college hackathon, handling 150+ team registrations.
- Developed responsive event and registration pages with payment gateway integration.
- Contributed to UI structure, frontend development, and deployment using Vite and GitHub.

PROJECTS

FilingLens | GitHub : Java, Spring Boot, Next.js, TypeScript, PostgreSQL (pgvector), Docker, GitHub Actions

- Built an SEC filing intelligence platform to search public companies, track a watchlist, and compare 10-K, 10-Q, and 8-K filings across reporting periods.
- Implemented a RAG pipeline that answers questions from filing text with verified citations, using pgvector semantic search with a keyword-search fallback and the Claude API.
- Designed a Spring Boot modular-monolith backend with scheduled SEC EDGAR monitoring and in-app, live, and email notifications for watched companies.
- Set up CI/CD with GitHub Actions: unit and Testcontainers tests, Playwright end-to-end tests, secret scanning, and Docker image builds on every push.

Expense Tracker | GitHub : MongoDB, Express.js, React, Node.js, Chart.js, JWT

- Built a full-stack MERN personal finance app to record income and expenses by category, with a dashboard showing total balance, monthly summaries, and recent transaction history.
- Designed versioned REST APIs (`/api/v1`) with Express and Mongoose for CRUD on income and expense records, with schema and request validation for amounts, dates, and categories.
- Implemented JWT-based authentication with bcrypt password hashing and protected routes, scoping every transaction to the signed-in user.
- Added interactive Chart.js visualizations of spending trends and category breakdowns, monthly budget limits with overspend alerts, and CSV export of filtered transactions.

SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python, C++, SQL, HTML, CSS
- **Frameworks:** Spring Boot, React, Next.js, Node.js, Express.js, Tailwind CSS
- **Databases:** PostgreSQL (pgvector), MongoDB, MySQL, Supabase
- **DevOps & Tools:** Docker, Jenkins, GitHub Actions, Git, Polarion ALM, Postman, Vercel, VS Code
- **AI:** LLM APIs (Claude), Retrieval-Augmented Generation (RAG), Vector Search
- **CS Concepts:** DSA, OOP, Operating Systems, Computer Networks, SDLC
- **Certifications:** Postman API Fundamentals Student Expert, Google Generative AI

EDUCATION

Bangalore Institute of Technology, Bangalore **Sep 2023 – Jul 2027**
Bachelor of Engineering, Computer Science and Engineering **GPA: 8.61 / 10**

LEADERSHIP

- **Core Technical Member, amBITion Hackathon:** Part of the core technical team for a hackathon with 700+ participants and 150+ project repositories.
- **Core Member, Google Developer Groups on Campus (Jan 2025 – Oct 2025):** Ran a 7-day bootcamp covering AI, Web Development, Blockchain, DevOps, Git, and Figma.
